For graduate and undergraduate courses in general K-12 methods. B The new edition of this popular text clearly achieves its stated goal: to prepare prospective teachers to meet the challenges of today's changing classrooms by providing effective, practical, research-based practices in an accessible, conversational style. Material is based on a quarter-century of actual, in-classroom research that makes it possible to replace anecdotal suggestions for good teaching with solidly research-grounded strategies empirically related to positive outcomes. The author shows future teachers not only **what** to do to meet today's teaching challenges, but **how** to do it through the experiences of real teachers in real classrooms.
